PROFESSIONAL EXPERIENCE

Microsoft, Mountain View, CA *April 2022 - Present*
Software Engineer II
Technologies Used: C#, Go Lang, Kubernetes, Azure, REST API, Redis, GitHub, Cosmos DB, Copilot, MCP, Claude

- Added caching layer for retrieving receiver token to Arc Agents, improving the response time by 75%.
- Implemented GA APIs for the service, added swagger in public repository and relevant metrics to track the usage.
- Designed and automated the scale out solution to improve service reliability score by 27%.
- Created Azure Arc Connectivity QoS dashboards and improved the service performance to achieve 99.9% SLA.
- Redesigned and made the service scalable to increase its load handling capacity by 5 times.
- Developed an AI Assistant and MCP server to accelerate the debugging process for production incidents.

TIBCO Software, Palo Alto, CA *May 2021 - Aug 2021*
Software Engineering Intern
Technologies Used: Python, Robotic Process Automation, AWS EC2, MySQL, PostgreSQL, MS SQL Server

- Researched the viable open-source Robotic Process Automation (RPA) framework for database serialization.
- Developed a Python-based tool to integrate databases, reducing manual effort by 75%.
- Completed the POC for Database serialization that became the baseline for 5 new initiatives.

Tata Consultancy Services, Lucknow, India *Mar 2014 -Dec 2019*
Full Stack Software Developer
Technologies Used: Java, JavaScript, REST API, JQuery, PostgreSQL, Jenkins, Docker, Shell Script, Python

- Developed Java web applications with REST API using microservice architecture for data storage clients.
- Improved application performance by refactoring code and indexing reducing turnaround time by 80%.
- Liaison between business units, technology teams, and support teams with direct reporting to upper management.

TECHNICAL KNOWLEDGE

- *Languages*: C#, JavaScript, Java, Python, Go Lang
- *Front-end*: React, Redux, HTML5, CSS3, GraphQL
- *Back-end*: Node.js, REST API, Kafka, Spring Boot
- *Deployment*: Docker, Azure AKS, AWS
- *Database*: MySQL, MongoDB, Cosmos DB
- *Source Control*: GitHub, BitBucket
- *Testing Tools*: Junit, JMeter, Mocha
- *Data Visualization*: Plotly, Tableau
- *Others*: Robotic Process Automation, MVC, Kubernetes, Mongoose, Redis

EDUCATION

- **San Jose State University, San Jose, CA** *Jan 2020 - Dec 2021*
  Master of Science in Software Engineering GPA 3.8/4.0
- **Uttar Pradesh Technical University, India** *Sept 2009 - June 2013*
  Bachelor of Technology in Electrical Engineering GPA 3.9/4.0

ACADEMIC PROJECTS

No-Code Web Development for businesses *Fall 2021*

- Developed a **MERN stack** platform for small and medium scale business owners to bring their business online.
- Allowed website customization at UI level that would allow increasing the brand value and sales by 50%.
- Deployed front-end on **Heroku** and back-end on **AWS** instances supporting 50k per second incoming traffic.

Glassdoor prototype *Fall 2020*

- Built a **MERN stack** distributed prototype of Glassdoor.com along with an analytical dashboard.
- Implemented **Redis** caching in search, enabling the server to give output to 10k concurrent users within 5s.
- Integrated **Apache Kafka** on all APIs with multiple partitions for Fault-tolerance and High-throughput system.

Direct Exchange Currency Remittance Application *Fall 2020*

- Developed a currency remittance application with back-end on **Java Spring Boot, Hibernate**, and front-end on **React.**
- Implemented **Google** and **Facebook OAuth** using React libraries with a custom encrypted password for manual login.
- Used **Heroku** for the deployment of front-end application and **AWS** instance with API gateway for back-end.

AWARDS

- Won **Azure Core Quality Champ** award for automating the arc connectivity migrations, boosting service reliability.
- Awarded **Star Performer** award from NetApp client for coding the priority feature before the deadline.
- Got the **Technical Excellence** award from Tata Consultancy Services for mastering multiple new functionalities.
